

NORDIC GUIDES APPLICATION

Requirements

Public view requirements:

All the users of the application can see the public site without login. In the public site the following features are required:

- In the starting page there will be general information about pages, and Lapland. You can use as reference <https://www.visitfinland.com/lapland/>
- There is a link in navigation "Lapland". There you can gather some information about Lapland. Make also a photogrip of photos of Lapland
- Guides page displays the listing of guides. When you click on a guide, you will see information card about the guide.
- Cities page displays the information about cities. You can see the guides connected to the city by clicking "Show guides". When you click on the Country, you see the cities in that country only. From "Show guides" the listing of guides is displayed and you can click on guide to see the information card.
- In "About" page you will show the information about yourself with image of yourself

Admin view requirements:

Registered users can login to the adminsite by entering /admin/-folder through webbrowser. Users can register themselves as Guides from login page. Here are the features required for admin site:
